(54) **Field programmable printed circuit board**

(57) A field programmable printed circuit board is provided which includes a multiplicity of component contacts for making electrical contact to the leads of electronic components to be mounted on the printed circuit board, a corresponding multiplicity of interconnect contacts for receipt of the leads on the package or packages of a programmable integrated circuit or circuits for intercon-

necting as desired the electronic components, and one or more layers of conductive traces formed on the printed circuit board, each conductive trace uniquely connecting electrically one component contact to one interconnect contact.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 99 11 9839

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
